

# UNLOCK YOUR POTENTIAL KNOW YOUR CODE.

Empowering dental care providers to expand preventative care with genetic testing

## We can help!

This test assesses an individual's risk of developing dental caries and periodontal disease, developed by a team of geneticists, scientists and physicians

---

---

## BENEFITS TO PATIENTS

### INSIGHTS

Genetic results can offer additional insights into a patient's immediate and long-term oral health needs

### PATIENT CENTERED

Allows for dialogue between patients and dental care providers in a patient centered approach

### PREVENTATIVE

Can help to shape a preventative care plan that may include additional cleanings, products and/or education and counselling

## TEST PROCESS

1.

### TESTING

Patient registers test in portal and follows instructions for proper cheek swabbing

2.

### SAMPLE RETURN

Sample is placed in pre-paid return envelope and dropped in post box

3.

### ANALYSIS

Sample is received by our laboratory at Mount Sinai Hospital and analyzed

4.

### INTERPRETATION

Results from analysis are automatically interpreted using the polygenic risk score calculation and plotted graphically

5.

### RESULTS

Patient and dental care provider are notified the results are ready and can be accessed in the portal for review

## WHY CHOOSE US

### UNIQUE

The panels we develop are novel, and do not currently exist in the market.

### COST-EFFECTIVE

Everything is done in-house in our lab in Canada so we can avoid unnecessary costs by cutting middlemen.

### BEST IN-CLASS

Using advanced technology in genomics and a team of geneticists, scientists, physicians; and a fully equipped state-of-the-art laboratory in Canada.
